

## BLAZY SUSAN PINK CONES

### About the product

Blazy Susan pre-rolled cones are perhaps the most eye-catching brand of rolling papers on the PureSativa shelves. Designed in Colorado and manufactured in France from premium quality wood pulp, Blazy Susan cones are easily identified by their distinctive pink colouration.

The pink colour is derived from a natural dye and was originally intended to be a temporary promotional colour to raise awareness for breast cancer charities. Following a mountain of positive feedback and support, Blazy Susan decided to keep the pink colour permanently.

These cones come pre-roached and ready to fill, are non-GMO and are completely vegan-friendly. They deliver a slow, smooth burn and are flavourless and odourless.

These premium quality cones are available in a box / jars , giving you a lasting supply of pink cones for rolling at your leisure.

- Slow Burning
- Vegan
- Wood Pulp
