

SCALE CR JDS-600S 0.1G - SILVER CRS10

About the product

If you need to precisely measure a small amount of weight, these American Weigh Scales can do the job. The scales measure any weight between 0.1 gram and 600 grams, and they pick up every 0.1 gram in weight variation. An LCD display conveys the unit and the current weight, and it's backlit for optimal visualization. Select the unit of measurement you want to use from grams, ounces, carats, or pennyweights. The stainless steel weighing platform ensures balance and durability.
