RAW Flying Tray

The RAW Prepare For Flight Rolling Tray started as a joke where someone said "you should 'roll one as big as a plane and then take off.". Ever since then it has become one of our most unique and popular rolling trays, when you roll on this you are rolling in high class.

Tray Purpose

These RAW rolling trays serve their purpose perfectly. Keep your desk, floor, house clean and contain all your smoking goods and residue inside this rolling tray. The large rolling tray is nice and big it can fit all of your custom smoke supplies, the mini is great for just doing a quick roll or if you need one to travel with, and the small is in between with the best of both worlds! Grab your favorite pack of rolling papers, a good blend of filler, and this rolling tray to start making some smokes.

Tray History

Around a decade ago, RAW reinvented the rolling tray with the RAW Classic Rolling Tray. The rolling trays of the 1960's and 70's were thick metal with a smooth coating on top. They were created by old brands like the Italian CLUB rolling tray (which was the most famous one of it's time). Nowadays you can find the classic RAW Rolling Tray at almost every smoke shop, and RAWnabees peddle their inferior copies.
