

OOZE DESIGNER MYLAR BAGS - 1/8oz - 10pk

About the product

If there's one thing Ooze products are not, it's boring! These Designer Series mylar bags are no exception. The majority of the mylar bags used by dispensaries are plain, or just have a logo plastered on the front. Ooze takes it up a notch and combines the smell proof, child safe technology of these super durable bags with the cool designs you know and love from Ooze. The Abyss design is a slimy explosion featuring the Ooze logo. It has an intricate, swirled dark green background with a lighter green splat with tentacles extending out. The 1/8 size comfortably fits up to 3.5 grams of flower. The zipper seal closure is on the front of the bag instead of the very top, giving more room for fingers to grab hold and firmly pull it open. Mylar bags are a great storage option because they have an airtight seal that is smell proof, child resistant, and are very difficult to rip or tear. They also take up much less room than other storage options like pop tops or jars. Each individual box has 10 mylar bags in a slim package that has a window on the front to show off the design.
