

WATER PIPE MUSHROOM WPS1410 1CT

About the product

Travelling? Camping? Attending festivals? This 6" portable, light-weight, and even detachable silicone water pipe is the perfect companion for your outdoor lifestyle. Be the hero friend that is responsible for the HIGHlight of your adventures.

But wait it's silicone! Isn't silicone basically plastic? Is it safe to smoke? No need to worry! The silicone we use is non-toxic, food-grade silicone, and heat resistant. It also comes with a bowl piece made from borosilicate glass that is made for smoking creating a divide between the heat and the silicone. You can also easily disassemble this unique water pipe to reach the hard-to-reach areas and thoroughly clean this beauty.
