

OCB ORGANIC HEMP 1 1/4 UNBLEACHED ROLLING PAPER

About the product

The paper is made entirely from hemp grown in organic farming where no chemical pesticides are used. In addition, they do not go through any bleaching process, which is why the colour of the rolling paper is brown. The OCB organic rolling paper is a thin, slow-burning paper.

The adhesive strip is made of 100% natural vegetable gum arabic, which is obtained from the resin of certain types of trees. There are no chemicals in its composition either.

Finally, the paper booklet is made from recycled paper and printed with vegetable inks. These inks are made from vegetable oils, without solvents and the waste is biodegradable.

OCB organic rolling paper is the ideal choice for those who care about the planet.

OCB Rolling Paper Organic Hemp Size 1 ¼ Slow Burning, Ultra Thin, with Gum Arabic, Unbleached, GMO Free, Vegan and Sustainable Fiber Production.

Designed for Rolling Masters who want to live a 100% natural experience. The packaging is recycled and printed with vegetable inks.
