

COCO NARA CHARCOAL BIG 120CT/PACK

About the product

- Coconara coconut charcoal comes in a 120pc box.

- These are non quick light shisha coals for hookah pipes that require a burner to light.
- Coconara supplies your hookahs with 40 50 minutes of burn time per coal.
- These all natural accessories and parts are tasteless, odorless, and chemical free.

Coconara is one of the many brands of non quick light coconut charcoal on the market making supplies for your hookahs. Manufactured in Indonesia, coconara coconut charcoals in the 120pc box are compressed into individual rectangles so they do not leave a lot of ash and to prevent the charcoal from rolling off the top of your hookah bowl. Coconara shisha coals are all natural and do not contain any quick light chemicals and therefore require an electric burner or open flame to light properly. Being primarily used by either avid smokers of hookah pipes or hookah lounges, these accessories and parts are specifically designed for hookah smoking as they are odorless, tasteless, and chemical free. You can expect approximately 40 50 minutes of burn time per coal since these burn three times longer than most other charcoals on the market.
