

RAW CLASSIC CHALLENGE CONE 24" 1CT

About the product

- Raw always had a habit of surprising us with the creativity, but this time their creativity has reached a whole different level, they have come up with a 24 inch challenge cone.

- The basic idea of a challenge cone can be understood from its name itself, it's a challenge to the people to use this cone and finish it in one go as it's a 24 inch cone, this definitely will be a fun challenge for you and your group out there.
- These cones save you time because they come pre-rolled, so you get the cone properties without taking time to roll it. They are perfect for people who don't know how to hand-roll as well as for experienced tobacco lovers who like to optimize their time. They are the ultimate convenience in rolling because you only need to fill them up with whatever you like to smoke, twist off the end and light up.
- Raw cones use a water-based gum that takes a long time to dry. That means RAW cones are rolled, then they have to sit for 24 hours before they can be stacked and packed. It makes for very slow production.
