

BUDDHA BACKFLOW CONE BURNER IN21 1CT

About the product

Totally trendy among the indoor accessories: incense smoke that flows back, like a waterfall. The smoke does not float upwards but instead flows down. For this magical effect, you need a special incense holder.

This special backflow incense from *Goloka* can also be found at Eastern Trading Agencies.

Colorfull Buddha on lotus

- The colorful holder is made of ceramic and with her design of the Buddha in meditation posture sitting on a lotus and with a lotus above his head, she creates a magical effect: the smoke flows from top to bottom along the other side of Buddha and disappears into a water hole under his feet. Enjoy this magical view reminiscent of a white river of wonderfully scented smoke. The whole has a soothing appearance.
- This fragrant waterfall is a surprising gift to get, but even more fun to keep it yourself.
