

VASELINE LIP THERAPY 0.35OZ ADVANCED REGULAR 1CT

About the product

With its original formula, Vaseline Lip Therapy is a lip balm you can rely on that provides long-lasting relief from dryness, dullness and cracked lips. This everyday essential for healthy-looking lips is made with 100% pure Vaseline Jelly, just like all Vaseline lip care products. Vaseline jelly is the original wonder jelly that has been helping to heal dry skin since 1870, and now you can get all its benefits in a lip balm product exclusively designed for lips. The top, protective layer of skin on your lips is thinner than on the rest of your body, so it needs a lip balm that provides long-lasting moisturization. These formulas help support the natural recovery of your dry lips by locking in moisture for healthy looking lips. And since it comes in a lip balm tube, it's perfect for on-the-go to help fight the elements that can be hard on your lips. Vaseline Lip Therapy Lip Balm Tube is great for safeguarding against dryness caused by weather, so you can be confident that your lips are ready to face the outdoors. Use alone, or in combination, with our other Vaseline products including body lotion, body butter, sprays, lip balms and petroleum jelly. We're proud to be working with Direct Relief in our mission to promote better skin health for everyone around the world. The Healing Project provides dermatological care, Vaseline Jelly and medical supplies needed to help heal the skin of people affected by poverty or emergencies around the world.
